Services for Industry (FX10)

- Originally, only academic users have been allowed to access our supercomputer systems.
- Since FY.2008, we started services for industry
 - supports to start large-scale computing for future business
 - not compete with private data centers, cloud services ...
 - basically, results must be open to public
 - max 10% total comp. resource is open for usage by industry
 - special qualification processes/special (higher) fee for usage
- Currently Oakleaf-FX is open for industry
 - Normal usage (more expensive than academic users)
 - 4 groups (FY.2014) (1 IT, 3 manufacturing), fundamental research
 - Trial usage with discount rate
